# SportsWipe™

## Microfibre Fabric

Designed for comfort and performance SportsWipe towels absorb an incredible six times their weight in moisture. Studies show microfibre reduces bacteria collected on the skin by up to 92% compared to 76% for standard cotton.

## Supporting The Community

SportsWipe towels are cut, dyed, over-locked and printed by a combination of skilled and special needs workers. They work side by side at our production facility in Melbourne where our special needs workers not only benefit from on going training but thrive working outside the traditional sheltered workshop environment. Our skilled employees also benefit through their commitment to a supervised mentorship program that provides support and encouragement to our wonderful special needs workers.

## Washing Instructions

Able to be washed time and time again SportsWipe towels are designed to last.

HAND WASH

HANG DRY

DO NOT IRON

NO FABRIC SOFTENER
